**Total floor area** 213 square metres

### You can read guidance for landlords on the regulations and exemptions.

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

**Energy rating and score** 

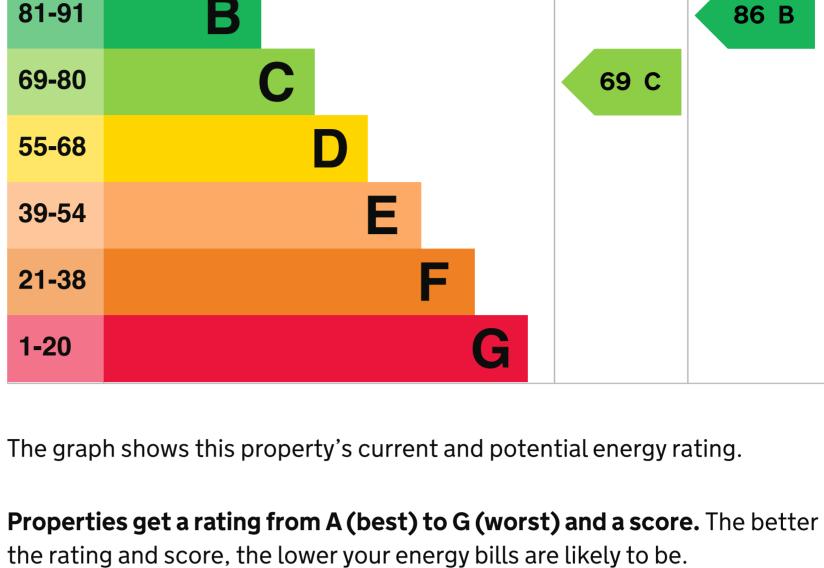

## See how to improve this property's energy efficiency.

92+

Score **Energy rating** Current

This property's energy rating is C. It has the potential to be B.

B 81-91

For properties in England and Wales:

• the average energy rating is D • the average energy score is 60

#### Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

(assumed)

Breakdown of property's energy

#### Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Features in this property

performance

**Description Rating Feature** Wall Timber frame, as built, insulated Good

Pitched, insulated (assumed) Roof Good Roof room(s) insulated (assumed) Roof Good

Root	Roof room(s), insulated (assumed)	Good
Window	Fully double glazed	Good
Main heating	Boiler and radiators, oil	Average
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Average
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Suspended, insulated (assumed)	N/A
Secondary heating	Room heaters, wood logs	N/A
Low and zero carbon energy sources		
	energy sources release very little or no CO2. elp reduce energy bills as well as cutting carb	•

### Primary energy use

• Biomass secondary heating

square metre (kWh/m2). ► About primary energy use

How this affects your energy bills

You could **save £82 per year** if you complete the suggested steps for

The primary energy use for this property per year is 120 kilowatt hours per

emissions. The following low or zero carbon energy sources are installed in

An average household would need to spend £1,543 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

improving this property's energy rating.

• 13,976 kWh per year for heating

• 2,785 kWh per year for hot water

this property:

### living at the property may use different amounts of energy for heating, hot water and lighting.

**Heating this property** Estimated energy needed in this property is:

This is **based on average costs in 2025** when this EPC was created. People

Impact on the environment

This property's environmental impact rating is D. It has the potential to be B.

6 tonnes of CO2

6.0 tonnes of CO2

2.7 tonnes of CO2
